## PYMEDIO'S MODULE DOCUMENTATION

**class** pyMEDio.**MEDReader** (*med\_file*, *output\_format='MED'*)  
MEDReader class

Class to open and extract object from a MED file.

Possibilities are the following -> Read meshes in the MED file -> Read fields in the MED file :

-> Fields defined at the nodes level -> Fields defined at the elements level

### Methods

**\_read\_elem\_data** (*msh\_name*)

Method which reads elements informations about mesh, i.e. connectivity and elements groups

**read\_mesh** (*msh\_name=None*)

method which read mesh definition and return a Mesh object

**Parameters** **msh\_name** : string optional,

the name of the mesh to read, if None it is the first mesh defined in the med file which is read

**Returns** **output** : Mesh

the corresponding mesh object

**class** pyMEDio.**MEDWriter** (*med\_file*, *input\_format='MED'*)

### Methods

**write\_mesh** (*mesh\_obj*, *iteration=1*)

Method which write mesh informations; coordinates, connectivity, groups in the MED file

**Parameters** **mesh\_obj** : Mesh

the Mesh object to write in the MED file

**iteration** : int (optional)

the iteration number associated to this mesh

## INDICES AND TABLES

- `genindex`
- `modindex`
- `search`

## Symbols

`_read_elem_data()` (pyMEDio.MEDReader method), 5

## M

MEDReader (class in pyMEDio), 5

MEDWriter (class in pyMEDio), 5

## R

`read_mesh()` (pyMEDio.MEDReader method), 5

## W

`write_mesh()` (pyMEDio.MEDWriter method), 5
